

# eDistanceTruck

Attractive electric drive solutions for long-haul transportation above 26 tons

Powertrain and electrified mobility

Broad portfolio of versatile solutions – from individual components to complete systems

## CO<sub>2</sub> reduction

helps in achieving fleet CO<sub>2</sub> targets

- ▶ The scalable, easy-to-integrate solutions are suitable for various installation options and powertrain topologies, such as fuel cell electric drives, battery electric drives, and hybrid powertrains.
- ▶ Bosch offers many years of experience and expertise in preparing for the start of high-volume production projects combined with economies of scale and synergies from the passenger car segment.
- ▶ The fuel cell electric drive enables a long driving range and fast refueling.
- ▶ Lower battery capacities or a longer range for battery electric commercial vehicles thanks to the high efficiency of the electric drive system.

## compact design

enables easy integration into existing vehicle platforms
